ENVIRONMENTAL LABELLING OF PACKAGING

As of 1st January 2023, the Legislative Decree No. 116 of 03rd September 2020 on the environmental labelling of packaging came into force in Italy with the aim of standardising the markings on packaging, to facilitate easy identification and enable better management in the recycling and disposal of materials.

For the business-to-business (B2B) companies, the decree establishes that the nature of the packaging materials must be identified and communicated according to the material coding in European Decision 97/129/EC.

The environmental labelling guidelines for the appropriate compliance with environmental labelling requirements indicate that, as an alternative to physically labelling of the packaging, it is permitted to make these codes available via digital communication methods, on transport documents or other documentation attached to the goods.

Following is the alphanumeric coding according to European Decision 97/129/EC of the materials that constitute the packaging used by Acquaflex srl.

Acquaflex s.r.l

PACKAGING	DESCRIPTION	CODE
IBC	CAP	HDPE2
	STEEL CAGE	FE40
	STEEL PALLETS	FE40
	WOODEN PALLETS	FOR50
	PLASTIC PALLETS	HDPE2
	IBC BODY	HDPE2
	VENTING TAP	OTHER7
